Milvus Project Leader

Xiaofan, Luan

7 years working experience focused on open source database and big data system design. After graduation from Cornell university with a master degree, Xiaofan works for Oracle, Hedvig and Alibaba cloud. Xiaofan has built several distributed storage and database systems in public cloud.

Xiaofan is currently working at Zilliz as the head of engineering, in charge of R&D of Milvus open source project and the Zilliz cloud platform.

Collaboration with LF AI & Data projects and members

- Adopted ONNX (graduated project) to manage deep learning models in the Milvus bootcamp applications
- Working with GSI Technology (general member) to support GSI APU processor in Milvus
- Working with Baidu (premier member) in multiple Paddlepaddle and EDL cases
- Initial discussion with Vulkan Kompute (sandbox project) about the integration

The image displays two GitHub repository screenshots. The top screenshot shows the `milvus-io/bootcamp` repository, specifically the file `bootcamp/etc/onnx_and_milvus/milvus_with_different_models.ipynb`. It features a commit by `shiyu22` titled "new-bootcamp" and a section titled "Run Image Similarity Search with Milvus on Different Models". The text below the title states: "In this example we will run two models to generate image feature vectors and do similarity search with Milvus. At the same time, we will use ONNX to manage the different models(Vgg16 and Resnet50)."

The bottom screenshot shows the `PaddlePaddle/PaddleRec` repository, specifically the file `PaddleRec/recserving/milvus_tool/`. It features a commit by `Bennu-Li` titled "Update" and a list of files: `README.md`, `config.py`, `milvus_insert.py`, and `milvus_recall.py`, all updated 2 months ago. Below the file list is a `README.md` section with the title "README" and the following text: "Milvus 是一款开源的特征向量相似度搜索引擎。本工具是基于 Milvus 实现的提供向量存储与召回的服务。你可以将本工具用在推荐系统中的召回这一过程。"
