

# Marquez Home

 <b>MARQUEZ</b>	INCUBATION	Marquez is an open source metadata service for the collection, aggregation, and visualization of a data ecosystem's metadata. It maintains the provenance of how datasets are consumed and produced, provides global visibility into job runtime and frequency of dataset access, centralization of dataset lifecycle management, and much more. GitHub: <a href="https://github.com/MarquezProject">https://github.com/MarquezProject</a>
