## Overview

There is a good degree of intersection between LF AI & Data and other LF foundations/projects (or others) both at interest level and also membership. The GB is looking for the TAC to explore:

- Collaboration with other LF foundations/projects such as CNCF and Edge, and identify other potential organizations / projects
- Collaboration with external projects/initiatives (Example: [AI4EU](#) is a European project, a consortium composed of different European companies - Their goal is to create an AI platform for Europe and they chose Acumos (Thank you Orange!)
- Better alignment, possible joint demos, etc.
